RESTAURANT OPERATIONS, MADE CLEARER

RestaurantOS
Live Demo Guide

Kisi bhi restaurant owner ko product confidently samjhane ke liye simple Hinglish walkthrough.

Admin Dashboard | Orders & Tables | QR Ordering | Branches & Team

Is guide ko kaise use karein

5-10 minute ka demo dikhayein: pehle dashboard, phir menu/table/order, aur end mein customer ke phone par QR order. Sample data demo ke liye hai; apne real prices ya credentials ko pehle check karein.

10-minute demo ka simple flow

Pehle customer ki problem samjhein, phir screen dikhayein. Har module ko detail mein explain karne ki zaroorat nahi—ek connected order journey dikhana sabse effective hai.

1 min	2 min	3 min
Business context	Dashboard & branches	Menu, tables & order

1. **Opening: restaurant ka workflow poochhein**
   "Aapke yahan dine-in, takeaway aur delivery mein se kaunse order types chalte hain? Kitni branches aur tables hain?"
2. **Dashboard se shuruaat karein**
   Dashboard par module counts, order status summary, recent orders aur paid sales dikhayein. Sample organization "Spice Garden Demo" aur 2 branches use kar sakte hain.
3. **Menu aur table setup dikhayein**
   Categories, products, prices aur availability ka short tour dein. Dining Tables par jaakar table status aur per-table QR page dikhayein.
4. **Ek order ka lifecycle explain karein**
   Dine-in, takeaway, ya delivery order ka example dikhayein. Pending → Preparing → Ready → Completed workflow samjhayein; payment record karna aur table link dikhayein.
5. **QR customer experience live dikhayein**
   Table detail se QR menu link kholein. Product add karein, cart quantity/total dikhayein, order submit karein aur confirmation receipt samjhayein.
6. **Settings aur next step par close karein**
   Currency, tax, service charge, delivery fee aur receipt footer dikhayein. Customer se poochhein ki unke setup mein kaunse branches/team members shamil honge.

OPENING LINE

"Main aapko ek sample restaurant ke through dikhaunga ki menu, tables aur orders ek hi dashboard se kaise manage hote hain. Aap beech mein apne workflow ke questions pooch sakte hain."

Admin dashboard mein kya dikhana hai

Side navigation ke order mein modules cover karein. Access role ke hisaab se alag ho sakta hai; Admin ko full business setup milta hai.

01 Dashboard

Module counts, order status, recent orders, aur available sales summary ka overview.

Admin → Dashboard

02 Organizations

Restaurant business ki main profile. Iske andar ek ya zyada branches ho sakti hain.

Admin → Organizations

03 Branches

Location, contact details, branch code, aur branch-level operations manage karein.

Admin → Branches

04 Staff Management

Users create karein aur Admin, Manager, Staff role assign karein. Manager organization-scoped; Staff assigned branch-scoped hota hai.

Admin → Staff Management

05 Categories & Products

Menu categories, product details, selling price, cost price, type, aur availability maintain karein.

Admin → Categories / Products & Menu

06 Dining Tables

Table number, capacity, status, aur per-table QR link. Table detail page

Admin → Dining Tables

07 Orders

Dine-in, takeaway, delivery. Order items aur price snapshot, customer c

Admin → Orders

08 Settings

Currency, tax label/rate, service charge, delivery fee, receipt header/foo

Admin → Settings

09 Website & Contact

Public website par product pages, pricing preview aur contact enquiry

Public website → Pricing / Contact

Demo ke liye sample organization:
Spice Garden Demo · City Centre + Riverside · Menu mein Starte

Sample order statuses:
Pending, Preparing, Ready, Completed, Cancelled. Completed o

MODULE TRANSITION

"Yeh alag-alag screens hain, lekin data connected hai: branch ka menu usi branch ke orders aur tables ke saath use hota hai."

QR demo: guest se order receipt tak

Yeh demo ka sabse visual hissa hai. Ek QR code ek specific table se linked hota hai—customer ko account banane ki zaroorat nahi.

STEP 01

Table QR kholein

Admin → Dining Tables → table row ke Actions → View. Detail page par QR ya menu link milega.

STEP 02

Menu browse karein

Customer QR scan karta hai aur usi restaurant branch aur table ka menu dekhta hai.

STEP 03

Items select karein

Add dabate hi Added/quantity indicator, cart lines, quantity controls aur live estimated total dikhte hain.

Order ke baad customer ko kya dikhega?

Confirmation
Order items
Price breakdown

Total due

Status: Order sent · Payment: Restaurant par dena hai

Staff side par explain karein
New QR order dine-in order hota hai, anonymous guest ke naam par (account user nahi), unpaid status ke saath, aur correct table ID se linked. Staff Orders page se preparation status update karte hain.

QR replace karna
Table detail par Replace QR code confirm karne se old printed c table par lagayein.

Live demo se pehle QR checklist

✓ Product available ho aur category active ho.

✓ Table Available ya Occupied ho.

✓ Phone aur laptop same reachable environment par hon.

✓ Production QR ke liye APP_URL public HTTPS domain ho.

Important: QR flow online payment process nahi karta. Customer order submit karta hai aur payment restaurant mein hoti hai. Cart ka estimate hai; final amount server-side configured price/tax se calc

Demo se pehle tayyari

Demo local development environment par chal raha ho to localhost wala QR customer ke alag phone par open nahi hoga. Production/live demo ke liye public URL configure karein.

✓ Database ready; migrations applied.

✓ Admin login tayyar; credential secure rakhein.

✓ APP_URL sahi host par point kare, agar QR phone par scan karna hai.

✓ Sample data ke liye **php artisan db:seed**.

✓ Orders, tables, products dashboard par visible hon.

✓ QR menu par ek test order place karke receipt check karein.

Admin aur demo account

Admin account secure interactive command se banayein: **php artisan admin:create-admin admin@example.com**. Command name aur hidden password poochti hai. Seeder ke Manager/Staff demo accounts ke passwords random hote hain; local den Password ko PDF, slide, ya public screen par kabhi na likhein.

Common questions ka short jawab

Customer ka sawal	Demo mein jawab
"Kya QR order meri table par hi aayega?"	Haan. Har table ka unique QR token us table ke menu/order URL se linked hai.
"Kya customer online pay karta hai?"	Abhi nahi. Order submit hota hai; payment restaurant mein record/collect hoti hai.
"Kya manager sab branch dekh sakta hai?"	Manager organization ke scope mein hai; Staff assigned branch tak scoped hai.
"Kya system automatic inventory track karta hai?"	Demo mein Product & Menu management available hai. Stock/purchase inventory workflow ko available capability ke roop mein promise na karein jab tak woh imple
"Pricing final hai?"	Website par dikhayi pricing illustrative proposal hai; final commercial pricing confirm karni hogi.

DEMO CLOSING LINE

"Aapke restaurant ke liye pehle organization/branch setup, menu aur tables configure karenge. Phir aap staff ke saath orders chala sakte hain aur har table ka QR print kar sakte hain. Agla step hai aapk

Presenter tip: Demo ke dauran sample data ko clearly sample batayein. Customer ka actual business, tax setup, payment expectations, aur branch requirements alag se confirm karein.
